

Project Initialization and Planning Phase

Date	10 Jul 2026
Team ID	xxxxxx
Project Name	Smart Lender – AI-Powered Loan Approval Prediction System
Maximum Marks	3 Marks

Define Problem Statements (Customer Problem Statement Template):

Create a problem statement to understand your customer's point of view. The Customer Problem Statement template helps you focus on what matters to create experiences people will love. A well-articulated customer problem statement allows you and your team to find the ideal solution for your customers' challenges. Throughout the process, you'll also be able to empathize with your customers, which helps you better understand how they perceive your product or service.

Example:

I am	I'm trying to	But	Because	Which makes me feel
A bank credit officer evaluating loan applications	Approve or reject loan applications quickly and accurately	Manual verification is slow and time-consuming	Many applicant details must be verified before making a decision	Concerned about making accurate loan approval decisions

Problem Statement (PS)	I am (Customer)	I'm trying to	But	Because	Which makes me feel
PS-1	A bank credit officer evaluating loan applications.	A bank manager reviewing loan recommendations.	Manual verification takes too much time.	Multiple applicant details must be verified before approval.	Stressed about making the right loan decision..
PS-2	A loan applicant applying for financial assistance.	Get my loan approved quickly.	The approval process is slow and uncertain.	Banks manually verify financial and personal information.	Anxious about whether my loan will be approved.
PS-3	A bank manager reviewing loan recommendations.	Make reliable loan approval decisions.	Manual analysis takes time and may lead to inconsistent decisions.	Every application requires careful financial evaluation.	More confident when supported by AI-based loan predictions.
