

Problem-Solution Fit

Date	10 Jul 2026
Team ID	XXXXXX
Project Name	Smart Lender – AI-Powered Loan Approval Prediction System
Maximum Marks	5 Marks

Problem-Solution Fit Canvas:

Use the framework below to ensure your proposed solution accurately addresses the root causes, behaviors, and limitations of your target audience. Fill out the canvas in the respective boxes just like the original visual template.

1. CUSTOMER SEGMENT(S) [CS] Bank employees, loan officers, and credit analysts are the primary users of the Smart Lender AI system. It also benefits loan applicants by providing faster and more accurate loan eligibility decisions.	6. CUSTOMER LIMITATIONS EG. BUDGET, DEVICES [CL] Bank employees often face limited time, increasing workloads, and difficulty in analyzing multiple applicant profiles, making manual loan evaluation less efficient.	5. AVAILABLE SOLUTIONS PROS & CONS [AS] Existing loan approval methods rely on manual verification and traditional banking software. Although they are reliable, they require significant time and effort and lack intelligent decision support.
2. PROBLEMS / PAINS + ITS FREQUENCY [PR] Manual loan verification is time-consuming and may lead to inconsistent	9. PROBLEM ROOT / CAUSE [RC] The major challenge is the dependence on manual loan evaluation, which increases	7. BEHAVIOR + ITS INTENSITY [BE] Users collect applicant information, review financial details, verify

decisions. Managing multiple applicant records and evaluating loan eligibility manually increases workload and delays the approval process. □ Lack of centralized applicant history.

processing time, workload, and the possibility of human errors during decision-making.

eligibility, and make loan approval decisions based on available data and prediction results.

3. TRIGGERS TO ACT [TR]

The need for faster loan processing, reduced manual effort, and accurate loan eligibility prediction encourages financial institutions to adopt an AI-based loan evaluation system.

10. YOUR SOLUTION [SL]

Smart Lender AI uses machine learning to predict loan eligibility, analyze applicant information, maintain prediction history, generate reports, and assist bank employees in making faster and more accurate loan approval decisions.

8. CHANNELS OF BEHAVIOR [CH]

The system is mainly accessed through the Smart Lender AI web application in a digital banking environment, while supporting document verification through offline banking processes.

4. EMOTIONS

BEFORE / AFTER [EM]

Users want a reliable system that helps them make confident and accurate loan approval decisions while reducing stress and improving customer satisfaction.
