

Demonstration of Proposed Features

Date	10 Jul 2026
Team ID	XXXXXX
Project Name	Smart Lender AI – AI-Based Loan Eligibility Prediction System
Maximum Marks	1 Mark

Demonstration of Proposed Features:

This document summarizes the major functionalities implemented in the Smart Lender AI – AI-Based Loan Eligibility Prediction System. All proposed features were successfully designed, developed, integrated, tested, and demonstrated. The application combines machine learning with a user-friendly web interface to assist bank employees in making faster and more accurate loan eligibility decisions.

S.No	Feature Name	Description	Status (Implemented / Partial / Pending)	Demonstrated (Yes / No)	Remarks
1	AI-Based Loan Eligibility Prediction	Developed a machine learning model to predict loan eligibility using applicant information and trained multiple algorithms before selecting the best-performing model..	Implemented	Yes	Successfully predicts loan approval with high accuracy..
2	Smart Loan Prediction Web Application	Developed a Flask-based web application with an interactive interface for entering applicant details and predicting loan eligibility.	Implemented	Yes	Fully functional responsive web application.
3	Prediction Analysis & Eligibility Score	Displays loan status, eligibility percentage, confidence score, risk level, and AI-based prediction analysis.	Implemented	Yes	Generates detailed prediction insights for decision support.
4	Applicant Profile & Loan History	Maintains applicant profiles, prediction history, previous loan records, and customer behaviour analysis.	Implemented	Yes	Provides a complete customer profile for bank employees.
5	PDF Report Generation	Generates downloadable PDF reports containing applicant details, prediction results, eligibility score, and recommendations.	Implemented	Yes	Professional report generated successfully.
6	Dashboard & History Management	Displays prediction history, summary statistics, search, filter, and applicant profile management.	Implemented	Yes	Successfully stores and manages prediction records.

Feature Implementation Summary:

Total Features Proposed	12
Total Features Implemented	12
Total Features Demonstrated	12
Overall Implementation Rate (%)	100%
