

Project Demo Planning

Date	10 July 2026
Team ID	XXXXXX
Project Name	Smart Lender AI – AI-Based Loan Eligibility Prediction System
Maximum Marks	1 Mark

Project Demo Planning:

A well-organized demonstration helps showcase the key functionalities and technical implementation of the Smart Lender project in a clear and systematic manner. This demo plan outlines the sequence of presentation, responsibilities of each team member, and the major features to be demonstrated during the final project evaluation.

S.No	Demo Section	Description	Duration (mins)	Responsible Member
1	Project Introduction & Problem Statement	Introduce the project, explain the limitations of the traditional loan approval process, define the project objectives, and discuss how Smart Lender provides an AI-powered solution for loan eligibility prediction.	1 min	Shaik Shahil
2	System Architecture & Backend Implementation	Present the overall system architecture, explain the Machine Learning layer and Flask backend architecture, discuss application workflow, REST APIs, prediction pipeline, and backend functionalities.	1 min	Shaik Shahil
3	Machine Learning Pipeline & Model Training	Demonstrate dataset preprocessing, missing value handling, feature engineering, model training, evaluation of Decision Tree, Random Forest, KNN, and XGBoost, and explain the automatic model selection process.	1 min	Shaik Shahil
4	Model Performance Analysis & Reports	Present the Charts & Analysis dashboard, compare the performance of all trained models using accuracy, ROC-AUC, confusion matrices, and feature importance reports, and explain why the selected model was deployed.	1 min	Shaik Shahil
5	Web Application Demonstration	Demonstrate the Smart Lender web application by filling the loan application form, performing a real-time prediction, displaying the prediction result, confidence score, AI risk factor breakdown, EMI calculator, DTI ratio, and Dark Mode functionality.	1.5 min	Shaik Shahil
6	Batch Prediction, Reports & Project Conclusion	Demonstrate the Batch Prediction module by uploading a CSV file, generating prediction results, viewing the analytics reports, summarizing the project outcomes, and concluding the demonstration.	0.5 min	Shaik Shahil

Step	Activity	Notes
1	Project Introduction & System Overview	Introduce Smart Lender AI, explain the problem statement, objectives, and system architecture.. <i>(Presented by Obulapuram Venkata Naga Surya Sai Anusha)</i>
2	Machine Learning Workflow	Explain dataset preprocessing, feature encoding, model training, evaluation, and selection of XGBoost as the final model. <i>(Presented by Obulapuram Venkata Naga Surya Sai Anusha)</i>
3	Live Application Demonstration	Demonstrate applicant details entry, AI loan prediction, eligibility score, risk level, prediction analysis, applicant profile, history, and PDF report generation. <i>(Presented by Obulapuram Venkata Naga Surya Sai Anusha)</i>
4	Conclusion & Question and Answer Session	Summarize project features, achievements, future enhancements, and answer questions from the evaluation panel. <i>(Presented by Obulapuram Venkata Naga Surya Sai Anusha)</i>
